## DETAILED ACTION

### *Response to Arguments*

1. Applicant's arguments filed on January 19<sup>th</sup>, 2006, with respect to claims 1-17 have been fully considered and are persuasive. The previous office action has been withdrawn.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Pritchard (US 5,048,729).
4. As to claim 1, Pritchard teaches an inhaler that comprises a sealed reservoir 12 (see figure 1) including a dispensing port 35 (see figure 1); a channel communicating with the dispensing port and including a pressure relief port 39 (see figure 1); a conduit 34 providing fluid communication between an interior of the sealed reservoir and the pressure relief port of the channel (see figure 1); a cup assembly 17 (see figure 1) movably received in the channel (see figure 1) including a recess adapted to receive medicament when aligned with the dispensing port (see figure 1), a first sealing surface adapted to seal the dispensing port when the recess is unaligned with the dispensing port and a second sealing surface adapted to seal the pressure relief port when the recess is aligned with the dispensing port and unseal the pressure relief port when the recess is unaligned with the dispensing port (see figure 1).

*Allowable Subject Matter*

5. Claims **2 through 17** are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
